

Fluorescent Endangered Animals

- ① Sketch out your animal lightly in pencil. Break it up into simple shapes. Erase until you have a drawing you're happy with.

- ② Using a ruler, draw lines in the background. They can be vertical, horizontal or a crazy mish mash.

- ③ Paint the background using fluorescent colors. Try not to have any of the same colors touching.

- ④ Using colored pencils, crayons or oil pastel, carefully add realistic color to your animal. Trace outside with sharpie.
